NOTE : (1) The average yield of cholam and groundnut crops in Krishnagiri area was very low as the crops in many of the selected fields was reported to have been affected by drought conditions.

(2) The average yield of cholam in Palladam Centre was low as the condition of the crop was reported to be very unsatisfactory in a number of plots (both recipients and controls) chosen for the experiments due to want of rain.

(3) The difference in the yield of crops was found to be statistically significant except in the case of groundnut crop in Krishnagiri Centre and cholam crop in Batlagundu Centre.
